

Rotary Dial Index Drives

Cyclo-Index DT Series mechanical index drives are designed for dial plate indexing and many other intermittent motion applications.

The Cyclo-Index 3400 Series Dial Table Index Drive Package is designed to provide automation engineers with a compact and reliable rotary dial indexer. 3400 DT Drives feature a modified sine motion, widely accepted in the industry for mechanical intermittent motion drives.

STANDARD PACKAGE

- 3400 DT Series Indexer.
- 1/3 hp, 90V DC motor.
- Worm drive reducer with various ratios.
- DC motor controller, variable speed, dynamic braking.
- Cam and limit switch for cycle-on-demand.
- Center through-hole (1.75") for power/signal apparatus.
- Universal mounting capability.

DT SERIES FEATURES

- Globoidal cam.
- Large output element.
- Low profile.
- Rugged cast-iron housing.
- Wide variety of motions.

CAPACITIES AND KINEMATIC DATA: 3400 DT DRIVE

# Stops	Motion	Constant Velocity	K_j	K_t	Internal Inertia (lb-in ²)	B_{10} Capacity (in-lb) at 50 Indexes/Min	Max Torque Capacity (in-lb)
4	330-1/4	33%	0.22	0.38	110	3527	5482
