

Automation for accurate positioning

- Cyclo-Index patented motion offers controlled acceleration for a smooth index.
- Conveyor is available in carousel or over/under configurations.
- Each system has steel mounting surfaces for tooling and equipment.
- The unit employs our precision-machined link assemblies.
- Each link features internal roller bearings for precise, quiet operation.
- Precision cam followers assure durability, accuracy, and ease of maintenance.

The Cyclo-Index Precision Link Conveyor is designed to be a foundation for automation applications that require accurate positioning. The heart of this package is our proven Cyclo-Index Drive, which assures the highest quality and performance. Our standard models can be customized to fit your precise specifications for motion and speed.
